

Concept

The Anybus X-gateway acts as a translation device between two different fieldbus networks.

Internally the gateway consists of two separate network interfaces, mounted at the top and bottom end of the gateway respectively, and a translation device handling communication between the interfaces. For more information about the specific interfaces, please refer to the **Network Installation Sheet** for each fieldbus network.

Gateway Status LED

| Indication | Meaning |
|---------------|-------------------------|
| Green | Communication running |
| Red | Communication error |
| Red, flashing | Network interface error |

The interface-specific LED indicators are described in the Network Installation Sheets for the respective fieldbus network interfaces.

Power Connector (X3)

| Pin | Signal |
|-----|---------------------------|
| + | 24 VDC $\pm 20\%$ Class 2 |
| - | Ground |

DIN Rail Mounting (standard)

Align the gateway with the DIN rail connector, then press firmly on the top end and push the lower end into place.

To dismantle the gateway, press firmly on the top end, then pull the lower end away from the DIN rail.

DIN Rail Mounting (sideways)

Remove the sticker covering the screw holes on the right side panel. Unscrew the DIN clip from the back and refit it to the side panel.

Mount/dismount the gateway the same way as in standard mounting.

Screw holes behind sticker

EMC Compliance (CE)

This product is in accordance with the EMC directive 2014/30/EU through conformance with the following standards:

- **EN 61000-6-4 (2007)**
Emission standard for industrial environment
EN 55016-2-3, Class A (2010)
- EN 55022, Class A (2011)
- **EN 61000-6-2 (2005)**
Immunity for industrial environment
EN 61000-4-2 (2009)
EN 61000-4-3 (2006)
EN 61000-4-4 (2012)
EN 61000-4-5 (2014)
EN 61000-4-6 (2014)

Technical Specifications

| | |
|---------------------------|--|
| Power supply | 24 VDC \pm 20 % Class 2 |
| Power consumption | 200 mA at 24 VDC (typical) 400 mA at 24 VDC (maximum) |
| Operating temperature | -25 to +65 °C @ 400 mA/24 VDC |
| Non-operating temperature | -40 to +85 °C |
| Relative humidity | 5–95 % non-condensing |
| Protective Earth (PE) | Internal connection to PE via the DIN rail |
