

## **Statement: Anybus Wireless Bridge and CIP Safety™**

The Anybus Wireless Bridge II and Anybus Wireless Bolt [parts numbers: AWB2000, AWB2030, AWB3000, AWB3010] is compliant to transport CIP Safety on EtherNet/IP™ using WLAN or Bluetooth according to the guidelines given in The CIP Networks Library, Volume 5 CIP Safety, Chapter 2-3.1.3 Bridging Different Physical Layers.

### **General comment about CIP Safety**

CIP Safety is an "end-to-end" type of protocol and is therefore independent of underlying physical layers such as Wireless LAN or Bluetooth.
